

CL 720 POLYSILOXANE SLIDE 50

PRODUCT DESCRIPTION

CL 720 Polysiloxane Slide 50 is general purpose lubricant and release for dissimilar material. It has a very effective “Anti Stick” agent.

CL 720 Polysiloxane Slide 50 is a transparent coating and is effective over a wide temperature range of -40 °F to +450 °F.

CL 720 is non-staining and oil free which most of the printers love our Silicone Dry Lube.

CL 720 eliminates squeaking, sticking and binding while also reducing friction. It also formulated with an ultra high viscosity silicone which is odorless, colorless, non-staining and heat stable.

CL 720 Polysiloxane Slide 50 is waterproofs and preserves surfaces of rubber, plastics, leather, wood and metal.

APPLICATION

- Compression molding
- Conveyors chains
- Doors & hinges
- Injection molding
- Plastic Gears
- Rubber Components
- Sliding Surfaces
- Knife blades
- Cutting table
